

A CALIFORNIA GOLD STORY

Drilling the next chapter

CORPORATE PRESENTATION | FALL 2026

FORWARD LOOKING STATEMENTS

Certain statements contained in this presentation may constitute “forward-looking statements” or “forward-looking information” (collectively, “forward-looking statements”) and are made pursuant to the “safe harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 and Canadian securities laws. Forward-looking statements are statements which relate to future events. Such statements include estimates, forecasts and statements with respect to exploration and project development, community consultation, estimated future trends, plans, strategies, objectives and expectations, including with respect to costs, capital requirements, acquisition of additional assets, availability of financing, exploration activities and potential, future operations and expectations regarding permitting and exploration at the K2 Gold projects.

Information inferred from the interpretation of sampling and drilling results may also be deemed to be forward-looking statements, as it constitutes a prediction of what might be found to be present when, and if, a project is developed. In some cases, you can identify forward-looking statements by terminology such as “may”, “should”, “expects”, “plans”, “anticipates”, “believes”, “estimates”, “predicts”, “will”, “potential”, “continue” or the negative of these terms or other comparable terminology. All statements and information other than statements of historical fact may be forward-looking statements. These forward-looking statements are based on a number of assumptions, including: the successful completion of planned exploration and sampling within the timelines anticipated; that required financing and permitting will be obtained; general economic conditions; that labor disputes, flooding, ground instability, fire, failure of equipment or processes to operate are as anticipated and other risks of the mining industry will not be encountered; general conditions in the mining industry; title to mineral properties; and no changes in laws, rules and regulations applicable to the Company.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements, or industry results, to differ materially from those anticipated in such forward-looking statements. The Company believes the expectations reflected in such forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct, and readers are cautioned not to place undue reliance on forward-looking statements due to the inherent uncertainty thereof. Some of the risks and other factors which could cause actual results to differ materially from those expressed in the forward-looking statements contained in this presentation include, but are not limited to: the Company is an exploration stage company; competition with other companies with greater financial and human resources and technical facilities; maintaining compliance with governmental regulations and expenses associated with such compliance and community consultations; ability to hire, train, deploy and manage qualified personnel in a timely manner; ability to obtain, amend or renew required government permits; failure to discover new reserves or develop new operations; risks and hazards associated with exploration and mining operations; accessibility and reliability of existing local infrastructure and availability of adequate infrastructures in the future; environmental regulation; ownership of, or control over, the properties on which the Company operates; maintaining existing property rights or obtaining new rights; risks associated with expansion and development of mining properties; inability to access additional capital; problems integrating new acquisitions and other problems with strategic transactions; directors’ and officers’ conflicts of interest and reliance on key executives; currency exchange rate fluctuations; no dividend payments; no operating history or operating revenues; volatile share and commodity prices; and negative research reports or sampling results, as well as other risks and uncertainties identified in the Company’s management’s discussion and analysis for the year ended December 31, 2024 available under the Company’s profile on SEDAR at www.sedar.com and in other disclosure documents filed from time to time.

Although the Company has attempted to identify important factors that could cause actual results or events to differ materially from those described in the forward-looking statements, you are cautioned that this list is not exhaustive and there may be other factors that the Company has not identified. Furthermore, the Company undertakes no obligation to update or revise any forward-looking statements included in this presentation if these beliefs, estimates and opinions or other circumstances should change, except as otherwise required by applicable law. For the reasons set forth above, prospective investors should not place undue reliance on forward-looking statements.

Eric Buitenhuis, MSc, P.Geo., Vice President Exploration of K2 Gold and a Qualified Person under National Instrument 43-101, has reviewed and approved the scientific and technical information in this presentation.

MOJAVE TIMELINE

YEARS IN THE MAKING. NOW DRILLING.

BUILDING ON KNOWN GOLD. THE NEXT PHASE OF EXPLORATION IS UNDERWAY

RESPONSIBLE **EXPLORATION**

A SMALL **FOOTPRINT.**

WHAT RESPONSIBLE EXPLORATION AT MOJAVE ACTUALLY LOOKS LIKE

~0.48 ACRES

New surface disturbance under the approved program

NO NEW ACCESS ROADS

Helicopter-supported exploration

10,175 GALLONS

Estimated total program water use

Actual Drill Site at Mojave

Typical operating footprint – 20' x 30'
(timber support pad – 16' x 13'
where required)

RESPONSIBLE **EXPLORATION**

A COMPREHENSIVE **APPROACH.**

ENVIRONMENTAL, CULTURAL AND RECLAMATION MEASURES ARE BUILT INTO THE APPROVED PROGRAM

BIOLOGICAL PRE-CLEARANCE

Qualified biologists' complete surveys and pre-clear sites before any ground disturbance.

ARCHAEOLOGICAL REVIEW

Archaeological specialists conduct cultural resource surveys and identify exclusion areas.

CULTURAL-RESOURCE MONITORING

Cultural monitors are on site during activities, in coordination with participating Tribes.

RECLAMATION

Sites are reclaimed in accordance with the approved Plan of Operations and BLM requirements.

TRIBAL MONITORING

Participating Tribes provided the opportunity for monitors at active drill sites

MOJAVE DISTRICT SCALE

MULTIPLE POLYMETALLIC TARGETS DEFINED.

MOJAVE | 2026 PROGRAM

14,000 M PHASE II DRILL PROGRAM UNDERWAY.

- ✓ Rolling drill results from Dragonfly and subsequent target areas
- ✓ Follow-up drilling planned at Newmont
- ✓ Surface sampling and target-development results across Flores, Morningstar, Stega and Gold Valley
- ✓ Advancing potential access to additional Mojave target areas*

THE FULLY FUNDED PROGRAM IS UNDERWAY, WITH ASSAY RESULTS TO BE REPORTED FOLLOWING RECEIPT AND INTERPRETATION.

*Potential access, scope and timing remain subject to confirmation.

TSXV: KTO | OTCQX: KTGDF | FSE: 23K

MOJAVE | MORNINGSTAR

THE NEXT FRONTIER.

HIGH-GRADE SILVER-GOLD TARGET

750 m × 2 km polymetallic trend

615 rock samples collected in 2026

HISTORIC SUNSET • IGNACIO
• MORNINGSTAR WORKINGS

Gold • Silver • Copper • Base Metals

SYSTEMATIC SURFACE EXPLORATION
IS REFINING TARGETS ACROSS A
HISTORICALLY MINERALIZED TREND
ADJACENT TO MOJAVE.

AN UNTESTED COPPER-GOLD TARGET.

~1.8 KM MINERALIZED TREND
Open to the N-NW toward Soda Valley

UP TO 14.2% CU
Rock grab sampling

UP TO 12.68 G/T AU
Rock sampling

SURFACE MINERALIZATION DEFINES A
LARGE COPPER-GOLD TARGET THAT
REMAINS UNTESTED BY DRILLING.

WHAT COMES NEXT AT MOJAVE.

A CATALYST-RICH EXPLORATION PROGRAM DESIGNED TO BUILD THE DATASET AND DEFINE THE OPPORTUNITY

NEVADA GOLD-SILVER PROJECT

S12

Esmeralda County, Nevada

118 claims • 986 hectares

TSXV: KTO | OTCQX: KTGDF | FSE: 23K

SI2 | WALKER LANE, NEVADA

LARGE EPITHERMAL SYSTEM.

~8 km²

STEAM-HEATED ALTERATION SYSTEM

100%

OWNED

Alteration characteristics consistent with a preserved low-sulphidation epithermal system in Nevada's established Walker Lane gold district.

Silicon/Arthur is an exploration analogue only. Mineralization there is not necessarily indicative of mineralization at SI2.

TARGETING STRATEGY

FOLLOWING THE SYSTEM DEEPER.

INTEGRATED TECHNICAL WORK REFINED DEEPER STRUCTURAL TARGETS ACROSS THE SI2 SYSTEM

01

2023 DRILLING

Confirmed a gold-bearing
epithermal system

03

TARGET MODEL REFINED

Earlier drilling interpreted to have
tested the upper levels of the
hydrothermal system, above the
projected boiling zone

02

2026 DRILL TEST

3,871 m | 8 holes |
5 target areas

04

TECHNICAL WORK

Alteration mineralogy
Geophysics
Fluid inclusions
Structural interpretation

FIRST K2 DRILL TEST
AOI3 • AOI4 • AOI5

SI2 | 2026 DRILL RESULTS

A LARGE GOLD-BEARING SYSTEM CONFIRMED.

2026 DRILLING EXPANDED K2'S UNDERSTANDING OF THE SCALE AND ARCHITECTURE OF THE EPITHERMAL SYSTEM

01

BROAD GOLD ANOMALISM

210.3 m

@ 0.123 g/t Au*

SR26006 | A014

02

GOLD-BEARING QUARTZ
VEINING

1.286 g/t Au over 3.04 m
incl. 2.367 g/t Au over 1.52 m*

SR26008 | A013

03

SYSTEM SCALE

Gold-bearing hydrothermal
activity demonstrated across
multiple target areas.

2026 DRILLING DID NOT INTERSECT ECONOMIC GRADES, BUT PROVIDED FURTHER EVIDENCE
OF A LARGE GOLD-BEARING EPITHERMAL SYSTEM AND ADVANCED K2'S UNDERSTANDING
OF ITS SCALE AND ARCHITECTURE.

*Reported widths are drilled widths; true widths have not been established.
